EDUCATION

Myanmar Institute of Information Technology

Bachelor of Engineering (Honours) in Electronics and Communication Engineering

Dec 2017 – May 2025

Mandalay, Myanmar

EXPERIENCE

Party Revolution FZ-LLC

Jan 2026 – Present

Full-Stack Developer (Contract)

Remote

- Developed a real-time streaming platform with **NestJS** on the backend and **Next.js** on the frontend, using **MongoDB** for persistence, **Redis** for low-latency cache and session state, and **BullMQ** for background side-effect jobs.
- Engineered a streaming state machine that enables seamless switching from public broadcasts to private sessions via **Socket.IO** events, Redis state synchronization, and **Agora** channels for secure private streams.
- Implemented a session lifecycle manager to automate transitions, enforce performer availability, and process payment timeouts without manual intervention.
- Built a stream listener service to handle reminders, reconnection grace periods, and other asynchronous tasks outside the request cycle.

Car Showroom Website

Dec 2025 – Mar 2026

Full-Stack Developer (Freelance)

Mandalay, Myanmar

- Built a car showroom website with **React** on the frontend, **Express** on the backend, and **PostgreSQL** for persistent data storage.
- Hosted the application on **DigitalOcean** and used **Cloudflare CDN** to reduce latency and improve global delivery performance.
- Implemented image caching for less frequently changed assets, improving image load speed by 25% and reducing repeated network fetches.

VendorSage

Oct 2025 – Nov 2025

Associate Full-Stack Developer (Contract)

Remote

- Developed the notification service in **Go** with **PostgreSQL**, **gRPC**, **Next.js**, **Kubernetes**, and **Docker** to support internal alert delivery.
- Built a centralized microservice to manage multi-channel notifications (Slack, Email) for internal services through a **gRPC**-based communication layer.
- Implemented a flexible delivery engine supporting both real-time alerts and scheduled digests with custom routing logic.
- Built a reliability layer featuring automated retry workflows and task scheduling to ensure consistent message delivery.

ImpactHD

Jul 2024 – Sep 2025

Junior Developer (Contract)

Remote

- Developed cross-platform AI services for web and mobile using **React** and **React Native**, featuring real-time speech-to-text and generative image capabilities.
- Engineered a cross-platform notification system using **GraphQL Subscriptions** (Pub/Sub), ensuring low-latency, real-time alert synchronization between web and mobile clients.
- Developed a full-stack Beacon detection system for internal logistics, creating both the **iOS client (CoreBluetooth)** and the backend to automate asset tracking.

TECHNICAL SKILLS

Languages: Go (Golang), TypeScript, JavaScript, SQL (PostgreSQL), C, HTML/CSS

Technologies/Frameworks: React, Next.js, NestJS, Node.js, React Native, gRPC, Socket.IO, BullMQ

Databases/Infrastructure: PostgreSQL, MongoDB, Redis, Docker, Kubernetes, Nginx, AWS, DigitalOcean, Git
